

## Supplier Code of Ethics

## 1 Overview

Atlas Travel & Technology Group has implemented Corporate Social Responsibility (CSR) as an integral component of our business model. We hold a high ethical standard to all stakeholders with whom we do business and carefully consider these principles in all our decisions. It is our expectation that our partners and suppliers comply with the code of ethics put forth:

## 2 Improper Payments

Bribes, payoffs, special fringe benefits, unusual gain/other windfalls and all illegal payments by any current or future suppliers or outside vendors are inappropriate and strictly prohibited.

## 3 Labor Practices and Discrimination

Suppliers are required to be in compliance with any local or national labor laws regarding compensation, working hours and safety of employees.

ATTG is an equal employment opportunity employer and does not discriminate against any person because of race, color, creed, religion, sex, national origin, disability, age, genetic information or any other characteristic protected by law. We value and respect diversity and will not tolerate any supplier or partner who engages in unlawful employment discrimination, child labor or forced labor practices.

## 4 Human Rights

ATTG condemns all forms of human trafficking and the exploitation of any person (man, woman or child) for commercial gain. ATTG particularly believes that the protection of children from sexual exploitation is a moral imperative and socially responsible business policies and practices must reflect this principle.

ATTG will strictly comply with all applicable laws and regulations regarding the prevention of human trafficking and the commercial sexual exploitation of children, including the prevention of the use of its premises, services and products for such exploitation. We ask our business partners to do the same.

## 5 Environmental Responsibility

ATTG seeks suppliers that are aligned with our commitment to be good stewards of the environment and to minimize their negative impact on the environment. All suppliers, partners and vendors should be in full compliance with applicable laws and government authorizations.
